ACADEMIC INTERESTS

Quantitative Marketing and Service Operations in Hospitality

EDUCATION

Hanyang University Mar 2024–Aug 2027 (Expected)
Bachelor of Arts, Double Major Seoul, Korea
Tourism and Chinese Language and Literature
On track to graduate with Highest Honors (Summa Cum Laude)

Selected Coursework

Tourism Economics, Tourism Revenue Management, Cultural Tourism Strategy, Hospitality and Tourism Marketing, Creative Programming (Machine Learning), Creative Computing (Python), Artificial Intelligence and Machine Learning (Deep Learning), Quantitative Analysis of Language Data

SELECTED COURSE PROJECTS

Hotel Revenue Management Analytics

- Completed weekly Excel-based case analyses covering hotel performance management, pricing, demand forecasting, booking curves, overbooking, inventory allocation, group displacement, and distribution-channel management.
- Calculated occupancy, average daily rate (ADR), revenue per available room (RevPAR), net ADR, and gross operating profit per available room (GOPPAR); evaluated room-upselling and distribution-channel scenarios using incremental revenue, commission, and profitability measures.
- Conducted a group displacement analysis and recommended alternative dates projected to generate higher net revenue.

Tourism Dependence & Economic Impact Analysis: The Maldives

- Sourced and structured World Travel & Tourism Council (WTTC) data covering historical indicators and projections for tourism GDP and employment; created comparative visualizations for a research report.
- Benchmarked the Maldives' 2023 tourism contribution against global and South Asian averages and identified that international visitors accounted for 99.4% of total tourism spending.

ESG-Driven Regeneration & Business Strategy for Let's Run Park Seoul
Theories of Tourism Resources

- Formulated a master plan to transform the Korea Racing Authority's (KRA) flagship site into an ESG-integrated sports theme park, targeting non-race-day activity and audience diversification among families and people in their twenties and thirties.
- Structured space-utilization plans for 340 acres of idle assets using a Fishbone Diagram, incorporating esports management arcades, motion simulators, and glamping as proposed revenue sources.
- Developed a 130-person staffing plan and an ESG governance framework incorporating retired racehorse welfare programs and zero-waste partnerships with local food and beverage businesses.
- Designed a capital expenditure (CAPEX) allocation plan within public corporation revenue regulations, distributing proposed investments across ecosystem programs, running grounds, and immersive media centers.

World Youth Day 2027: "Global Youth Seoul Living Lab" & UGC Reporter Program
Tourism Policy Proposal Competition

- Conducted strategic analyses using PEST, SWOT, VRIO, and ESG frameworks and modeled financial feasibility using a KRW 115 million budget and over KRW 150 million in estimated tourist expenditure, equivalent to more than 130% of the budget.
- Designed a multilingual user-generated content (UGC) reporter system for young participants from over 100 nationalities to serve as global city ambassadors through short-form video creation.
- Formulated the "Global Youth Seoul Living Lab" framework, including a one-month stay package designed to meet Generation Z demand for "living like a local."

Strategic Business Analysis: Amazon Shopper Panel & Ad Attribution
Hospitality and Tourism Marketing

- Conducted an in-depth case analysis of Amazon Shopper Panel, evaluating Amazon's strategic move to capture off-platform, offline retail data in the cookieless era.
- Benchmarked Amazon Shopper Panel against established consumer panels and rewards platforms, including Nielsen, Circana/NPD, Google Opinion Rewards, and Ibotta, across data exclusivity, account-level ID integration, and digital advertising attribution.
- Assessed ethical and regulatory vulnerabilities relating to GDPR, CCPA, and antitrust laws, examining trade-offs involving consumer privacy (GPS and device ID tracking), data valuation fairness, and the acquisition of off-platform competitive data.

Market Evolution & Strategic Analysis of the Food Delivery Industry
Contemporary Issues in Service Industry

- Formulated strategic growth models incorporating delivery subscription mechanisms and assessed multiple dimensions of service quality using the SERVQUAL framework.
- Compared delivery platform business models, analyzing market survival factors, fee structures, and subscription-based customer retention strategies.
- Forecasted potential industry transformations by examining quick-commerce, autonomous last-mile logistics, including machine-to-machine (M2M) elevator-integrated delivery robots and drones, and intellectual property (IP)-driven ghost kitchens.

Nielsen PRIZM: Geodemographic Modeling & Hospitality Application
Hospitality and Tourism Marketing

- Analyzed the Nielsen PRIZM geodemographic framework and its 68 household-level lifestyle segments, examining how lifestyle narratives address the limitations of traditional demographic segmentation in explaining consumer motivations.
- Applied the PRIZM methodology to Marriott International's hotel marketing, profiling the Y1-34 segment to design targeted upsell packages, fitness partnerships, and digital channel strategies.
- Identified limitations involving adaptation to non-US markets and travel-specific situational variables, and proposed localized data re-engineering.

AI-Powered Emotion-Based Stayover Tourism Cluster: Chungbuk
International Tourist Behavior

- Proposed a conceptual framework for an AI-enabled smart tourism platform integrating traveler emotion and fatigue indicators, mobility patterns, augmented reality (AR) engagement data, and location-based activity logs to support personalized itineraries and local service recommendations.
- Formulated a smart tourism master plan for Chungbuk Province to shift dependence on day trips toward multi-day stays by establishing an interactive cluster of healing, nighttime, and workation experiences.
- Designed resident-participatory AR experiences co-created with local elders and artisans to preserve cultural authenticity and avoid excessive commercialization.

Aman Group: Global Brand Strategy & Industry Benchmarking
The Understanding of Hotel

- Conducted a brand audit of Aman Group, analyzing the evolution of its business model from remote ecological sanctuaries to urban lifestyle destinations and related offerings, including Janu, Aman Club, and Aman Yacht.
- Compared Aman with ultra-luxury peers Six Senses and COMO Hotels, evaluating medical wellness offerings and ESG and sustainability governance frameworks and initiatives, including GSTC and Earth Lab.
- Analyzed revenue optimization strategies involving Aman Club membership and lifestyle retail against the risk of prestige erosion in the high-end hospitality segment.

Organizational Behavior & Leadership Frameworks at Marriott
Hospitality and Tourism Leadership

- Conducted a comparative case study of former Marriott CEOs Bill Marriott and Arne Sorenson using Leadership Behavioral Theory and the universality hypothesis.
- Facilitated in-depth discussions on leadership priorities in high-stakes environments, examining the balance between organizational culture and crisis management.
- Synthesized insights on how relationship-driven cultures establish organizational trust, while corporate growth and complex market conditions, including the Starwood acquisition, the asset-light transition, and the pandemic response, call for more strategic, task-oriented governance.

Strategic Leadership & Luxury Heritage Transformation: Chaumet (LVMH Group)
Hospitality and Tourism Leadership

- Applied Transformational Leadership Theory and Strategic Reframing to analyze three executive eras: Béatrice de Plinval, Jean-Marc Mansvelt, and Charles Leung.
- Evaluated organizational transformation strategies across Chaumet's history, examining how leaders used historical archives to address financial crises and regulatory changes.

WORK EXPERIENCE

NLLN Co., Ltd. Dec 2025–Feb 2026
Intern

- Supported IT system implementation projects for manufacturing clients by analyzing adoption trends in AI agents, machine-learning solutions, and factory automation technologies, and contributing to sales strategy development.
- Participated in client site visits and working-level meetings to identify operational pain points and business requirements, analyze relevant data and root causes, and develop improvement opportunities and solution recommendations.
- Collaborated with engineering, consulting, and marketing teams to develop client proposals integrating technical and business perspectives.

VOLUNTEER EXPERIENCE

Kkumdungji Community Child Center Sep 2026–Present
Volunteer

- Provide weekly mathematics tutoring through a 10-week program for middle and high school students from underserved backgrounds, including students from low-income and multicultural families and students with disabilities.
- Teach mathematics across the Korean secondary-school curriculum, including algebra, geometry, probability and statistics, and calculus.

Hanyang Global Lions Supporters May 2025–Jul 2025
Student Supporter

- Led weekly cultural immersion programs for participants in the 2025 Hanyang International Summer School, serving a global cohort of over 1,712 students from more than 50 countries through themed field trips and guided cultural activities.
- Managed end-to-end cultural event operations, including program design, scheduling, logistics, stakeholder coordination, participant support, and on-site execution.

· Developed promotional content and delivered outreach sessions for university exchange programs, strengthening student awareness and engagement across an internationally diverse campus community.

CLUB ACTIVITIES

HUHS – Computer Engineering Club Mar 2025–Present

· Participated in regular peer learning sessions with computer engineering students and graduate students, gaining exposure to engineering coursework, technical textbooks, and graduate-level programming practices.

· Engaged in informal technical discussions and collaborative study sessions that strengthened an interest in programming, engineering research, and graduate education.

· Collaborated with club members to organize and operate a booth during the university festival, supporting event preparation, visitor engagement, and on-site activities.

ADDITIONAL INFORMATION

Languages Korean (Native), English (IELTS 7.5), Chinese
Hobbies Baking, hiking, and traveling

TECHNICAL SKILLS

Programming Python (NumPy, SciPy, Matplotlib)
